Rahul Mehrotra<sup>4</sup> "Architecture in a Time of Flux"  
  
Eric Bellin "Detailing Quality: Relational Thought Across Scales in Architecture"  
  
Priyanka Salunkhe and Naomi Mehta "Architecture beyond Form"

<sup>4</sup> **Rahul Mehrotra** is the principal founder of RMA Architects. He divides his time between working in Mumbai and teaching at the Graduate School of Design at Harvard University, Boston, where he is Professor of Urban Design and Planning and the John T. Dunlop Professor in Housing and Urbanization.

His Mumbai-based firm, RMA Architects, was founded in 1990. The firm has designed a software campus for Hewlett Packard in Bangalore, a campus for Magic Bus (an NGO that works with poor children), led the restoration of the Chowmahalla Palace in Hyderabad, and formulated a conservation master plan for the Taj Mahal with the Taj Mahal Conservation Collaborative. The firm also recently designed and built a social housing project for 100 elephants and their caretakers in Jaipur. In 2015 RMA Architects completed the *Lab of the Future* on the Novartis Campus in Basel, Switzerland and were finalist in an international design competition for the Museum of Modern Art in Sydney. Recent projects of the firm include a Library for the School of Architecture at CEPT, the Faculty of Arts and Sciences at Ahmedabad University, and a School of Public Policy at the IIM Ahmedabad. In 2018 RMA Architects were awarded the Venice Biennale Juror's Special Mention for "three projects that address issues of Intimacy and empathy, gently diffusing social boundaries and hierarchies."

His writings include co-authoring *Bombay: The Cities Within*, which covers the city's urban history from the 1600s to 1990 and *Bombay to Mumbai: Changing Perspectives*; and *Taj Mahal: Multiple Narratives*. He has also co-authored *Conserving an Image Center: The Fort Precinct in Bombay*. Based on this study and its recommendations, the historic Fort District in Mumbai was declared a conservation precinct in 1995, a first such designation in India. In 2011, Mehrotra wrote *Architecture in India—Since 1990*, a reading of contemporary architecture in India that was extended into a 2016 exhibition he co-curated at the National Gallery of Modern Art in Mumbai titled *The State of Architecture: Practices and Processes in India*. In 2012–2015, he led a Harvard University-wide research book project called *The Kumbh Mela: Mapping the Ephemeral Mega City*. This was followed in 2018 by a co-curated exhibition titled *The State of Housing: Realities, Aspirations and Imaginaries in India*, which is currently travelling in India.

Mehrotra's most recent books are *Working in Mumbai* (2020) and *The Kinetic City and other essays* (2021). The former a reflection on his practice evolved through its association with the city of Bombay/Mumbai. The second book presents Mehrotra's writings over the last thirty years and illustrates his long-term engagement with and analysis of urbanism in India. This work has given rise to a new conceptualization of the city, which Mehrotra calls the Kinetic City.
